Research profile:

TUTOR Sylwia Lewandowska - Associate Professor from Department of Genetics, Plant Breeding and Seed Production at Wrocław University of Environmental and Life Sciences, Poland. On 19th November 2019 I got a postdoctoral degree in agricultural sciences, discipline agriculture and horticulture. On 03rd November 2009 I got a doctoral degree in agricultural sciences, discipline agronomy. Currently, my scientific and research interests concern breeding, seed production and cultivation of legumes, especially soybean in the aspect of increasing yield and sustainable production of plant protein by developing genotypes adapted to climate and soil conditions in Central Europe. Last research studies are connected with application of modern methods in seed conditioning (different seed stimulation technologies); stimulation of germination ability of soybean seeds under the influence of biologically active compounds extracted from algae; studies on soybean root profile development; agroecological principles – sustainable agriculture; organic farming. In Poland I am leader of an international project (2019-2022) which is devoted to a high protein plant - soybean (*Gycine max* (L.) Merrill) and faba bean (*Vicia faba* L.), entitled “Increasing productivity and sustainability of European plant protein production by closing the grain legume yield gap”, acronym LegumeGap. Project: SusCrop-ERA-NET funded by the National Centre for Research and Development in Poland.

No SUSCROP/I/LegumeGap/01/2019.

Additionally, during the period 2017-2021 I carried out research on soybean as part of an international project „Innovation Network to Improve Soybean Production under the Global Change”, acronym INNISOY, funded by: EIG Concert Japan, Connecting and Coordinating European Research and Technology Development with Japan, main leaders: Tokyo University of Agriculture and Technology (TUAT), Japan; Leibniz Centre for Agricultural Landscape Research (ZALF), Germany. In 2018 I was a member of the Accreditation Commission in Croatia – Expert panel for the evaluation of the College of Agriculture in Križevci (Croatia). I used to have an experience working at primary and secondary school with children with physical disabilities. In addition, on behalf of the Wrocław University of Environmental and Life Sciences I am a coordinator of cooperation with research institutions in Germany: Dresden University of Applied Sciences (HTW Dresden); Saxony State Office for Environment, Agriculture and Geology in Dresden (LfULG). Lifelong learning advocate. A passionate teacher...

What is important to me in TUTORING?

- building a relationship with a student
- guiding a student to wisdom
- developing scientific interests
- recognizing student's potentiality in social relationship
- supporting a student in developing positive character traits

Tutoring for me is a friendly trip in an atmosphere of respect and dialogue of forming good character traits and good study habits.

I am a good listener to problems of other people and able to motivate a student and find mutual joy in it.

Who do I want to work with in tutoring, who do I invite to work with me?

I am open to cooperate with people who understand the fundamental importance of the teacher-student relationship for education. You are welcome!

What am I interested in?

- learning foreign languages
- open to discovering the cultures and tastes of other countries.
- fascinated by the culture of Japan...
- music lover...
