

dr hab. inż.

Anna

Zielak-Steciwko

Type of tutoring:

scientific and developmental

Language of tutoring:

Polish, English

E-mail: anna.zielak-steciwko@upwr.edu.pl

Fields of scientific and research interests: Genomics of bovine reproduction. Cell physiology, in particular intracellular pathways regulating proliferation, differentiation and death. Genome and environmental factors affecting ruminant's milk quality. Genetic potential of native Polish cattle breeds, being a reservoir of biodiversity, in terms of resistance to diseases.

"Too many university faculties are obsessed with trying to impress people with how smart they are ... rather than being obsessed with how smart they can make other people". With this motto, I invite you to scientific and developmental tutoring. I offer regular meetings adapted to student's individual needs and cooperation based on sincerity, kindness as well as mutual respect.
